Professional with 4 years of experience in the technology field, having worked across different sectors that contributed to a broad and versatile technical background:

- **IT Support (1 year):** User support, equipment maintenance, troubleshooting, and system assistance.
- **Software Development (1 year):** Application creation and maintenance, participation in development projects, use of best coding practices and version control.
- **Software Quality – Q.A (10 months):** Execution of manual tests, validation of functionalities, identification and documentation of bugs.
- **Data Analysis with Power BI (1 month):** Dashboard creation, data visualization, and support for decision-making based on indicators.

Currently, I am seeking opportunities to solidify my career in Software Development, while remaining open to *new challenges* that allow me to expand my knowledge and add value with my *multidisciplinary experience*. I am currently working as a Freelance Developer.

- WordPress

Experience

SEP. 2025 – NOWADAYS

System Analyst / AGE – Advocacia Geral do Estado, Belo Horizonte, Minas Gerais, Brazil

- Development (Sep. 2025): Creating a new Software, IDNexus Digital, focused on creating and validating documents for internal areas of the company, also responsible for managing the company projects on Github and Gitlab, updating Intranet systems;
- System Support(Sep. 2025): Responsible for providing user focused systems support on external softwares such as Tribunus and Argos;

APR. 2024 – MAY. 2025

Digital Intelligence Intern / Wabtec Corporation, Belo Horizonte, Minas Gerais, Brazil

- Q.A (Apr. 2024 – Dec. 2024): Worked with the SCRUM methodology in the Quality Assurance team at Wabtec, carrying out regression tests, bug bounty, bug validation tests, and supporting the development team.
- Intern Training Project (Oct. 2024 – May. 2025): Participated in an intern project, where I developed a tool for one of Wabtec Corporation's clients, using Node.JS, React, and Python Django, and led other interns in the team.
- Development (Jan. 2025 – May. 2025): After migrating to a new team, I worked integrated with the development team on an internal product migration, getting familiar with the product, its technologies (C# .NET Core and Node.JS Angular), and receiving training for both technologies.

OCT. 2023 – MAR. 2024

Full Stack Development Intern / ARSAE-MG, Belo Horizonte, Minas Gerais, Brazil

- Development of a customized ERP software product for the company's clients, created using React and Django, with a PostgreSQL database.
- Documentation of product features as they were developed.
- Support in creating data analysis software with Pandas and NumPy.

NOV. 2022 – OCT. 2023

T.I Support Intern / Fhemig, Belo Horizonte, Minas Gerais, Brazil

- Resolution of tickets via the designated platform.
- Proper use of hospital equipment.
- Maintenance, replacement, and installation of hardware devices.
- Monitoring changes in the local Ethernet network.

JUL. 2022 – AUG. 2022

Data Analysis Intern / Gestão do Sucesso, Belo Horizonte, Minas Gerais, Brazil

- Creation of KPIs with Power BI.
- Automation of database spreadsheets.
- Data formatting and KPI design.
- Project monitoring using SCRUM methodology.
